

## Ground Metal Detector MD-5008

### DESCRIPTION:

1. MD5008 metal detector use advanced international technology design, and be made by high quality Components;
2. High detect depth, exact orientation, strong resolving power and convenient operation modes it is popular with customers.
3. It can detect and identify the metals under ground
4. It has ground balance setting, which will eliminate the affect of ;Mineralization reaction;.
5. It can distinguish ferrous metal and non-ferrous metals
6. Adopt intelligent operating system
7. Packing with high-strong ABC material, light and long-lived
8. You can use earphone to recognize metal sounds

### SPECIFICATION:

1. Power supply: DC 12V
  2. Signal Frequency: 7KHZ
  3. Acoustics Frequency: 400HZ
  4. Sensitivity:
    - a. Small detect plate can detect 25-30cm (USD25 sent)
    - b. Big detect plate can detect 35-40cm (USD25 sent)
  5. The Detecting Depth (Max):
    - a. Small detect plate can detect 1.5 meters
    - b. Big detect plate can detect 3.0-3.5 meters
- Note: the sample object for detecting above is a 60x60x1 CM aluminum board
7. Unit weight: 3.2 kgs
